

# Guide to Products Equipped with Twiceme HTH Technology.

## What is Twiceme?

Twiceme is a technology that protects users before and after an incident.

The technology is integrated under the Twiceme symbol displayed on the product and can be found in various items such as helmets, jackets, and goggles.

Twiceme lets you upload your Medical ID to your gear, enabling bystanders and responders to access your medical information by tapping the Twiceme symbol with a smartphone.\*

Download the Twiceme app to explore additional features specifically designed to protect users before and after an incident.

\*In case of an accident, it is crucial for first responders to access important information about you to save time and make the rescue process smoother.

### BEFORE AN EMERGENCY

- Equipment health
- Get Back Timer

### AFTER AN EMERGENCY

- Rescue Alert
- Friends Alert
- Medical ID

### TWICEME SYMBOL

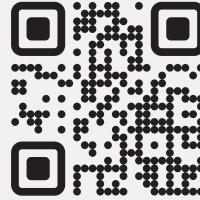

## Follow these steps to get started with Twiceme:

### STEP 1

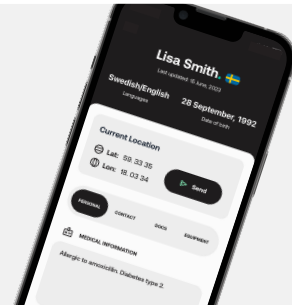

Download app.

### STEP 2

Create a Medical ID with your information.

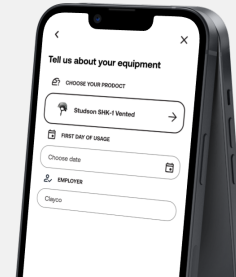

Go to the profile tab in the app and press the “Add Medical ID” button. You decide how much or how little information you add to the profile.

### STEP 3

Add the correct equipment to your profile.

Connected to your profile, choose the equipment you will upload the medical ID to.

### STEP 4

Upload your medical ID to the equipment.

Press the upload button in the app and hold the scanning area of your smartphone directly on top of the functional symbol on your equipment.

Having problems scanning? Hover the phone's scanning area around the symbol within 1-2" / 2.5 - 5 cm.

### STEP 5

Access info by tapping the phone on equipment.

Press the “Scan Twiceme Equipment” button on the Emergency page to activate the scanner. Then, tap the phone on the equipment to access the locally stored medical information uploaded by the wearer.
